jul 16 2014   this might answer your question basically it is html encoding for a few predefined characters characters like gt and amp are html entities specifically they are named html

feb 21 2011   i know that the entities lt and gt are used for and but i am curious what these names stand for does lt stand for something like left tag or is it just a code

authors should use gt ascii decimal 62 in text instead of so i believe you should encode the greater sign as gt because you should obey the standards

sep 2 2011   a set of general entities amp lt gt apos quot is specified for this purpose numeric character references may also be used they are expanded immediately when recognized and must
